

Corporate Social Responsibility Policies

Environmental Conservation

PITC is committed to the environment by complying with relevant environmental laws, regulations and agreements. PITC takes into account the environmental and social risks associated with a particular transaction, alongside other risk factors considered in PITC's transaction decision-making process. PITC continues to promote green projects and adopt general practices that could contribute to environmental care and conservation.

Programs and Activities

PITC addresses environmental issues, such as energy efficiency and climate change. The Corporation also adopts a clean and green environment through general conservation practices in the office.
